However, A/C-powered single or multiple-station smoke alarms installed as part of the original construction or rehabilitation project shall not be replaced with battery-powered smoke alarms. The effective date of this subsection shall be January 1, 2019.

1. A/C-powered smoke alarms shall be accepted as meeting the requirements of this section.

CARBON MONOXIDE ALARM REQUIREMENTS:

Carbon monoxide alarms shall be installed in all dwelling units in buildings in one- and two-family or attached single family dwellings, except for units in buildings that do not contain a fuel-burning device or have an attached garage, as follows:

1. Single station carbon monoxide alarms shall be installed and maintained in the immediate vicinity of the sleeping area(s).
2. Carbon monoxide alarms may be battery-operated, hard-wired or of the plug-in type and shall be listed and labeled in accordance with UL-2034 and shall be installed in accordance with the requirements of this section and NFPA-720.

5. The owner's manual or written operation instructions shall be provided during the inspection and left for the new occupant;
6. The extinguisher shall be serviced and tagged by a certified Division of Fire Safety contractor within the past 12 months or the seller must have a receipt for a recently purchased extinguisher; and

- Bathrooms - Excessive steam from a shower may cause a nuisance alarm.
- Near heating or air conditioning ducts
- The "Dead Air" space where the ceiling meets the wall (see Figure 5).
- The peak of an "A" frame ceiling at the top may prevent smoke from reaching the detector.
